Academic integrity text foschools to including course and module handbooks

1. Academic integrity and academics conduct

The University of Sussex has a set caldemic Integrity Values hich all strugtents asses expredited to curf set records will t

referencing system to use.

Trust:

Your tutors and fellow students can trust you to be honest about the work you produce and submit for assessment.

Fairness:

You agree that all students should be fairly treated and that you do not try to gain advantage by presentingwork for assessmenthat is not your own

Respect:

You treat other members of the academic community with respect: fellow students, your tutors and the admin staff.

Responsibility:

You take responsibility for your own learning and follow the University of Sussex Academic Integrity values and assessment regulations.

If you do not follow the Academic Integrity values, even if unintention and may be considered for Academic Misconduct Examples of academic misconduct include:

Collusion

Making your assessment available to others or working with others anassessment at should be carried out individually

Plagiarism:

Taking and using the intellectual work of other people without acknowledgement

Personation

Getting another person AI/ software (unless explicitly permitted in the assessment guidance from the moduleconvenor) to sit an exam for your prepare your assessments

2. School Referencing System

To work with Academic Integrity you must learn how to reference appropriately within your discipline, and continue to develop good academic practice throughout your studies. This may take a little time, but you will be more confident that the work you subfor assessment will meet the required standards for good academic conduct. You should attend all workshops, tutorials and academic advising session offered by **Ste**hool.

Youare required to use the following referencing systemmodules that are owned by the School:

- insert referencing system used by School or discipline
- state if any choice is allowed School or discipline
- providerationale if more than one system is uswidhin the discipline
- providerationale if different systems are required for different disciplines within the School
- state if this referencing system must be used by students taking a module owned by the Schoobffered as an elective
